Nikon 7x35 EX binoculars (ie the Extreme series) are shapely, compact binoculars with phenomenal parameters. So we have a powerful, more than 9 ° field of view - in no case will we "lose" the observed object. A small, 7-fold magnification means excellent image stability. The brightness is ensured by large prisms made of BaK-4 glass and very good MC layer. In addition, water resistance - full sealing with O-rings and filling with nitrogen, making it impossible for the binoculars to fog up during observation in conditions of high humidity or sudden changes in temperature. Also rain and a short dip of binoculars for a few minutes will not hurt. All this is confirmed by Nikon's long 10-year warranty on this pair of binoculars. Those who wear glasses will appreciate the very large retraction of the exit pupil and retractable eyecups, so they can comfortably observe without the need to remove the glasses and without losing sight of the periphery of the field of view. Miles of astronomy pay attention to the high optical efficiency and large, flat field of view characteristic of the Nikon EX series binoculars. A great daytime binoculars for hunters, astronomy enthusiasts looking for compact travel binoculars, as well as bird and sailor observers. Includes a neck strap, lenses covers and glasses, and a carrying case with a belt. Technical parameters

- Lens diameter: 35mm
- Zoom: 7x
- Exit pupil: 5mm
- Minimum distance of observation: 5m
- Construction of prisms: porropryzmatyczna
- Material of defective elements: optical glass BaK-4
- Field of view: 9.3 °
- Linear field of view at 1000m: 163 meters
- Anti-reflective layers: MC
- Central focus adjustment
- Weight: 800g
