Eyepiece SkyWatcher Ultra Wide Angle 11 mm with a huge, 80-degree field of view in a 1.25 inch frame.

WONDERFUL OPTICS A huge field of view, high-quality anti-reflective layers on all optical surfaces give very sharp, contrasting images and excellent correction of chromatic aberration and distortion, extreme resolution. The eyepiece is equipped with a rolled eyecup and a filter thread. The eyepiece is perfectly blackened inside, on the outside it is finished with anodized aluminum with a rubber ring for a certain grip.  $\varnothing$  Focal length: 11 mm  $\varnothing$  Own field of view: 80  $\varnothing$  Distance of the exit pupil: 9 mm  $\varnothing$  Diameter of binding: 1.25 inches  $\varnothing$  Anti-reflective layers: FMC  $\varnothing$  5-element eyepiece (in 3 groups) Warranty 2 years
