

ApoBird spotting scope with a diameter of 70 mm - perfect for bird watching, it works well in observations of nature, hunting, and - in the basic range - in astronomy. Known among hunters, chosen due to the quality of optics and waterproof (filled with nitrogen), rubberized construction. Comes with a cover and a table stand. It can be mounted on any photo tripod with 1/4 inch thread. To connect the camera (SLR, hybrid or compact) we recommend the AFOKAL ADAPTER. To connect a SLR camera, we recommend the SLIP ADAPTER / T2 (additionally required ring with T2 on the bayonet of the reflex camera) Technical parameters

- â€¢ Zoom: smoothly variable, 20-60 times
- â€¢ Lens diameter: 70 mm
- â€¢ Optical system: achromatic lens + Amici prisms
- â€¢ Optical glass: Bak-4
- â€¢ Anti-reflective layers: green, FC
- â€¢ Field of view: 2.5 ° - 1.5 ° (43.5 - 22 m / 1000 m)
- â€¢ Minimum distance of observation: 7.5 m
- â€¢ Outer diameter of the eyepiece: 38.8 mm
- â€¢ Length: 42 cm
- â€¢ Outer diameter from the lens side (width): 85 mm
- â€¢ Height (including eyepiece and tripod): 15 cm
- â€¢ Weight: 1175 g (1890 g complete with tripod and case)

Usage scenery birds planes digiscoping astronomy Additional information: Nitrogen-filled, waterproof, rubber-coated, rugged housing. Supplied with a 45 cm high table stand with a rotating head in all directions and a cover. Warranty 2 years (achromatic lens with a diameter of 70 mm) (zoom eyepiece with magnifications from 20 to 60 times) (in the set there is an adjustable table stand with a height of 45 cm, integrated sunshade) (set: telescope, tripod, cover)
