

# teleskopy.pl

Compact and functional rangefinder characterized by small size and weight, which within a few seconds performs measurements with an accuracy of 1 m, measuring the distance from the observed object. In addition to the basic measurement mode, additional modes are available to improve the measurement precision under various observation conditions, eg during rain and in the case of reflective objects. 4-fold magnification allows you to measure the distance of even small objects. Comfortable removal of the exit pupil (20mm) ensures high comfort of use. The emitted laser beam with a length of 905nm is safe for the eye and is characterized by high coherence and a negligible emission width. The distance indication is displayed in the eyepiece. A good, basic laser rangefinder for golfers and people training in shooting sports. Technical parameters

- Effective range: 4 - 800 meters
- Accuracy: +/- 1 meter for measurements up to 200m, +/- 5 meters for measurements above 200 meters
- Measurement time: from 2 seconds (normal conditions) to 15 seconds (rain, high air dustiness)
- Zoom: 4x
- Lens diameter: 21mm
- Field of view: 8 °, 140m / 1000m
- Power supply: 9V 6F22 battery
- Dimensions (mm): 110 x 90 x 40
- Weight: 180g
- Warranty 2 years (in the latest delivery, a slightly different look of the transport bag)
