Spinor 90/900 is a magnificent lens telescope (refractor) with a 90 mm lens diameter and 900 mm focal length. It allows to conduct very advanced visual observations of planets and the Moon, showing a large amount of details on the surfaces of these objects. It works great as a "planetary spotter" - especially in urban and suburban areas - but it also provides efficient observation equipment for around nebular objects. Under good observational conditions, it can show around two hundred nebulae, galaxies and star clusters contained in the Messier and NGC catalogs. In addition, it works well as a strong observation telescope, which can be put on a larger balcony or terrace. It also has a built-in focuser with a diameter of 1.25 inches, which allows the use of any glasses made in this standard. The whole is a perfect solution for both beginners and advanced observers, guaranteeing a very competitive price. Azimuthal assembly, which is equipped with a telescope is a recognized quality that guarantees very good stiffness, enabling observation at high magnifications, and at the same time simplicity of use (left - right, up - down, i.e. rotation in azimuth and height). The light, but strong aluminum height-adjustable tripod is easy to carry and at the same time stable, while the accessory shelf and the precise micromovement mechanism on hand-operated scrolls complete the set. OFFERED TELESCOPIC LANDS TO START OBSERVATIONS IN THE FIRST FALLING NIGHT - INCLUDES ALL NECESSARY ACCESSORIES Usage Moon the planet star clusters nebulae scenery Technical parameters

- â€¢ Optical system: lens telescope (achromatic refractor)
- â€¢ Lens diameter: 90 mm
- â€¢ Focal length of the lens: 900 mm
- â€¢ Lighted: 1/10
- â€¢ Switching capacity: 1.25 "
- â€¢ Theoretical range: 12.5 magnitude
- â€¢ Maximum useful magnification: 180x
- â€¢ Dimensions of the optical tube [cm]: 9 x 9 x 92
- â€¢ Height of the tripod [cm]: 70 - 123
- â€¢ Weight: 10.0 kg

Equipment The set includes the following accessories:

- â€¢ 1.25 "focuser
- â€¢ Long Eye Relief Super 25 mm (over 36x, 72x with Barlow lens) and 10 mm (over 90x, 180x with Barlow lens) - 1.25 "standard
- â€¢ Prismatic 45 ° prismatic insert
- â€¢ 6x30 shooting scope with cross
- â€¢ AZ-3 azimuth mount with micromovements
- â€¢ Lightweight and stable aluminum tripod with accessory shelf
- â€¢ Barlow lens 2x / 1,25 "

Warranty 3 years Warning! This device focuses a lot of light. Looking directly at the sun through this device can result in partial or complete loss of vision. For the observation of the Sun, we recommend the safest method of spectacle projection, that is, projecting the image of the target of our day star on a piece of paper.
